DETAILED ACTION

1. An amendment was received after Final rejection on 17 March 2005. Claims 3 and 5 have been amended. Claim 4 has been canceled. No new claims have been added. Claims 1-3, 5, and 6 are pending in the present application.

Allowable Subject Matter

2. Claims 1-3, 5, and 6 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Independent Claims 1 and 2 are directed to a method and apparatus for determining $A \bmod N$ using a calculating engine based on the Montgomery multiplication algorithm. The closest prior art, Tenca and Koc, "A Scalable Architecture for Montgomery Multiplication", hereinafter "Tenca", also discloses a method for determining the modular reduction of $A \bmod N$; however, Applicant argues that Tenca does not teach or suggest that both inputs of the Montgomery multiplication engine are processed word by word, and instead teaches that at least one of the inputs is processed bit by bit. This argument is persuasive, and the claims are therefore allowable.

Independent Claims 3 and 6 are directed to a method and apparatus for determining $A^B \bmod N$ using a calculation engine based on the Montgomery multiplication algorithm and using operations implementing the Chinese Remainder

Theorem. The closest prior art, Tenca in view of Compaq Computer Corporation, "Cryptography Using Compaq MultiPrime Technology in a Parallel Processing Environment", hereinafter "Compaq", also discloses a method for determining the modular exponentiation $A^B \bmod N$; however, Applicant similarly argues that, for the reasons above, neither Tenca nor Compaq teach or suggest, alone or in combination, that both inputs of the Montgomery multiplication engine are processed word by word, and that Tenca instead teaches that at least one of the inputs is processed bit by bit. This argument is persuasive, and the claims are therefore allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
